The MAILING DATE of this communication app			'ess			
Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on						
• • • • • • • • • • • • • • • • • • • •	action is non-final.					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is						
closed in accordance with the practice under E	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims						
4)⊠ Claim(s) <u>1-3</u> is/are pending in the application.						
4a) Of the above claim(s) is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
6) Claim(s) <u>1-3</u> is/are rejected.						
7) Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
9) The specification is objected to by the Examiner.						
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
	aminer. Note the attached Office	Action or form PTO	-152.			
Priority under 35 U.S.C. § 119						
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:						
 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No

DETAILED ACTION

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chonan in view of Graves and Summers.

Chonan shows a front suspension fork with a crown portion 11 having two collars 11a and two operation tubes 12. Two main tubes 13 each have an open, internally threaded top and movably receive the operations tubes. A bridge 14 is connected between the main tubes. Resilient members are received within the main tubes and pressingly support the operation tubes. Externally threaded caps 17 are fitted in the open upper ends of the operation tubes. The bridge 14 and crown portion 11 have matching curvatures.

It is not clear if the bridge is formed integrally as one piece with the main tubes and it is not clear if it lies in a common plane with the main tubes and collars.

Graves teaches integrally forming the upper ends of main tubes 6, 8, with a bridge 14.

Summer shows a bridge that connects upper ends of main tubes 24. the bridge lies in a common plane with the main tubes and crown collars.

It would have been obvious to one of ordinary skill in the art to integrally form the bridge of Chonan with the main tubes, as taught by Graves, in order to provide a rigid

۲.

unitary slider component that strengthens the torsional stability of the lower fork component. It would also have been obvious to one of ordinary skill in the art to form the bridge within a plane defined by the main tubes and collars, as taught by Summers, in order to provide an optimum amount of flexure by minimizing extreme flexure during adverse conditions and allowing enough flexure to minimize fatuge.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Barnish and Brair each show a front fork with threaded cap fasteners.

Bradbury and Turner each show a front fork with telescoping tubes and a bridge between lower fork members.

Fan shows a curved fork brace.

Yoshida and Yoshioka each show a bridge between lower fork legs that lies a common plane with the legs.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne Marie M Boehler whose telephone number is 703-308-0422. The examiner can normally be reached on 7:30-5:00, Monday-Thursday, and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lesley Morris can be reached on 703-308-0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
